

MEMORY Game (1 or more players)

Helps to train your brain, whilst learning facts about Wild cats.

Object:

The object of the game is to win as many cards as possible.

Use the 52 playing cards and place them face down.

Play:

The first player takes a card and then studies facts on the card for 15 seconds. The card is passed to player two, who selects the question to be asked: Where found; Weight; Habitat; Prey or Young. If answer is correct the card is given back to player one to keep. If the answer is wrong the card is placed face down to make a discard pile and the next player chooses a card.

Winner:

The player with the most cards after ten minutes wins. If a tie the players choose a different card each and the player who answers the most correctly wins.
