Roar of the Dinosaurs  
(3 – 5 players)

Object
To be the first player to score 60 points or more.

Cards
3 players use any 3 suits.
4 players use any 4 suits.
5 players use all 5 suits.

Deal
Deal the cards to the players, so each player will have 11 cards.

Bidding
Each player states how many tricks they will win. The winner of the trick is the player who lays the highest numbered card of the suit originally laid.

The total number of tricks bid MUST total: 10 or less; or 12 or more. (This means that when all 11 tricks have been won at least one player will have at least 1 more or less trick, than they bid).

e.g. 4 players: Player A bids 4, B bids 0, C bids 3 (Total 4+0+3 = 7) then player D can bid 0-3 or 5 or more.

Play
The player on the dealer’s left starts play by laying any card from their hand. All players must follow suit but if unable to follow then must discard a card from their hand. The winner of the trick is the player who lays the highest numbered card of the suit originally laid. Play continues with the winner of the trick in a clockwise direction laying any card as before. Again all players must follow suit but if unable to follow then must discard a card from their hand.

Game ends when all 11 tricks have been won.

Scoring
Each player starts with 20 points.
Players who make their number of tricks scores 10 points + 2 points for each trick, therefore player A would score 18 points.

Players who do not make their number of tricks deduct 1 point for every trick over or under from their points total. Therefore, if player A wins 2 or 6 tricks, they would deduct 2 points from their total points.

If a player bids ‘0’ (zero) tricks and succeeds in not winning a trick they score 20 points. For every trick scored they deduct 1 point from their points total.

Winner
To be the first player to score 60 points. If more than one player scores 60 or more then the winner is the player with the highest score.
